What Is 840?

EightForty is the world's first blockchain-based adult content platform on Binance Chain network, working with fully decentralized and smart contracts. Our services include public content and user-requested content from top-tier, professional & exclusive models, approved by our specialized team.

Verified contract:

The Problem We Solved

We know how hard it is to access to premier adult content while staying anonymous.

Nowadays adult sites require personal information about the user to access their VIP content. They either request for a credit card or, at least, an email. They also request users to agree to abusive privacy terms. 840 is here to solve that issue. Our platform will provide premium adult content while keeping the user completely anonymous. The platform will be capable of connecting the users with the available girls.

The user will remain anonymous at all times, unless he wants to establish a personal relationship with the girls available at their location. The platform will provide free personalized content for our users once a month and depending on the country you are located, you can even contact the girl you like to have direct contact, if wanted.

As if this were not enough, the platform will incorporate the best content of other porn providers and dating apps. We will combine them to offer the user a unique experience.

Our Mission

We have one clear and defined mission, which is connect users with exclusive girls.

How do we intend to achieve it? Through our innovative platform that will connect users with the girls, while both remaining anonymous. Therefore, our platform will benefit both the user and the service provider.

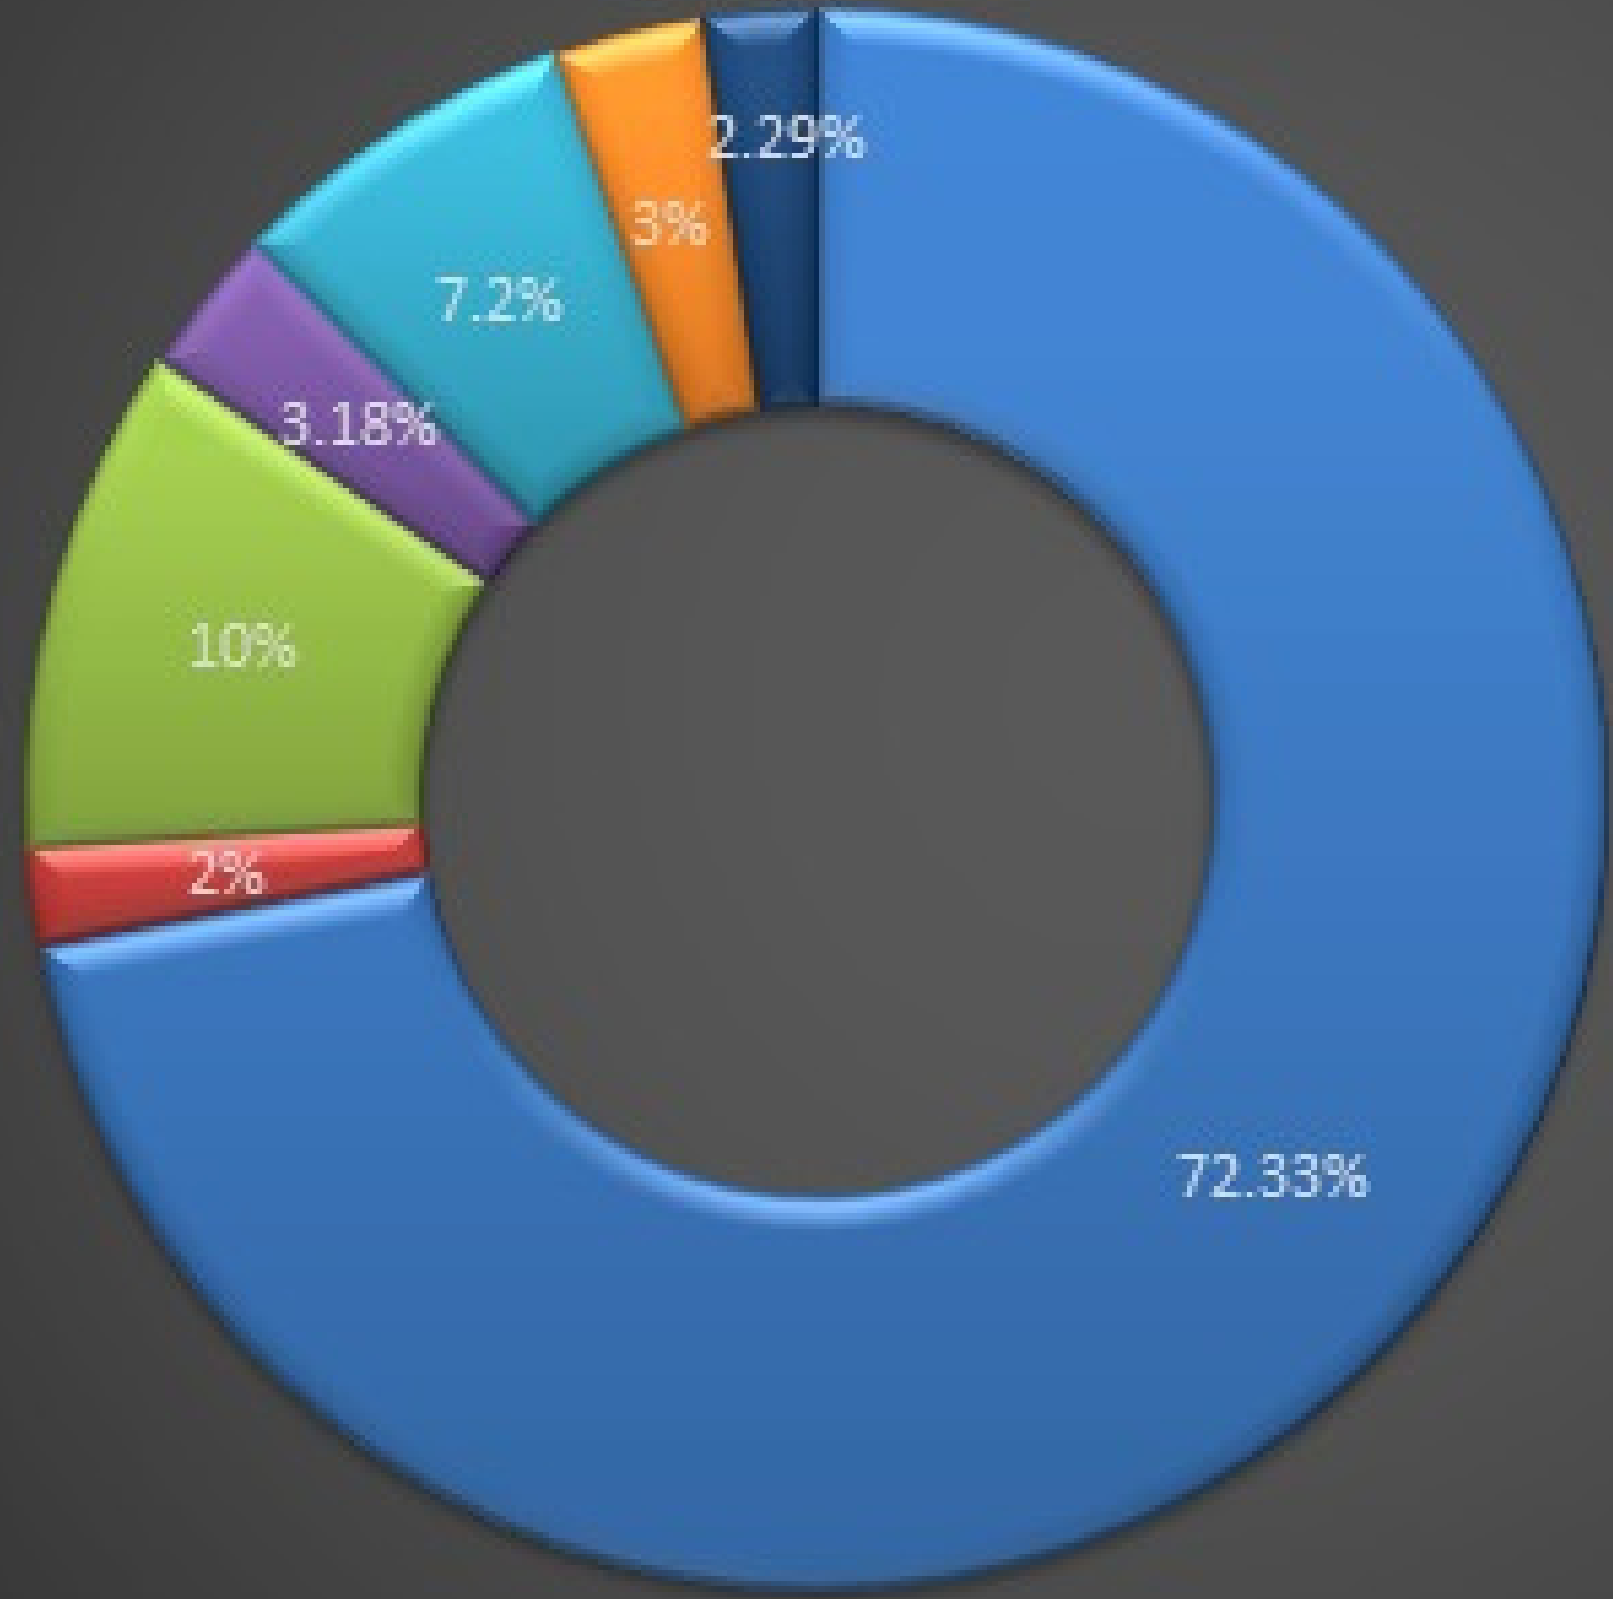

\$840 Token Value

You may be wondering how you will pay for the services we offer. The platform will only take \$840 as payment method. All of our girls will use \$ 840 as their currency and any other token will not be accepted.

Tokenomics

840 is the native token of the network. It will be used for to pay the models anonymously
